National Suicide Prevention Hotline

1-800-273-8255

Only half of all Americans experiencing an episode of major depression receive treatment.

On average, 1 person commits suicide every 16.2 minutes.

Each suicide intimately affects at least 6 other people.

Suicide is the 10th leading cause of death in the US for all ages.

Most suicidal individuals desperately want to live; they are just unable to see alternatives to their problems.

Nationally, suicide rates among youth (ages 15-24) have increased more than 200% in the last fifty years.

Nearly 30,000 Americans commit suicide every

Over 50% of all suicides are completed with a firearm.

Suicide is the second leading cause of death for college students

Females are more likely than males to have suicidal thoughts.

Suicide occurs across all age, economic, social, racial and ethnic boundaries
