# Walk to End Chagas

## What is Chagas?

A disease that affects 6-7 million people worldwide, specifically impoverished Latin Americans living in rural, tropical climates

## What is H3L?

Healthy Homes for Healthy Living, an initiative that builds homes every summer during the Ecuador study abroad program for families in Ecuador to ensure them a Chagas-free future! The funds we raise will be donated to the Healthy Living Initiative so they can buy materials for next year's home(s).

The 8th anti-Chagas home currently being built for the Vásquez-Rivas family!

Chagas is transmitted via a parasite in the feces of the kissing bug. It's similar to a mosquito- it bites the face at night while you're sleeping, and the parasite enters your body through your eyes, mouth, or a cut/scratch. The disease is chronic, considered incurable, and there is no vaccine.

The only way we can prevent the disease is by providing people with better infrastructure to keep kissing bugs out of their homes!

# Walk to End Chagas
