

Dear NCRE Member,

We are conducting a study of current Doctoral students in rehabilitation graduate programs and their perceptions about their relationship with their major academic advisor. This is a national study of rehabilitation graduate programs; the input of each and every current doctoral student is critically important. The results of this research potentially may be used to improve doctoral student retention, satisfaction, and self-efficacy within their respective academic programs. In particular, we are requesting the participation of current Doctoral students in rehabilitation in completing an online survey. We appreciate your time and assistance in making this research possible.

This research project has obtained permission to gain access to the NCRE membership for purposes of furthering the mission of the association. This research project has been reviewed and approved by the Southern Illinois University Carbondale, Winston Salem State University, and Assumption College Institutional Review Board.

If you are a current Doctoral student in rehabilitation who has completed at least one semester of doctoral study, and you would like to participate in this study, please provide your name and preferred email address to one of the principal researchers below. If you know doctoral students who might be interested, please forward this email to them.

Sincerely,

James L. Soldner, Ph.D., CRC, BCBA-D
