

COUNSELORS IN TRAINING READINESS IN CHILD MALTREATMENT

Join us for an important research study discussing knowledge and readiness for working with children who have experience matreatment

RESEARCH PURPOSE

The purpose of this study is to examine Counselors in Training perceived knowledge and readiness in treating children with potential trauma to specifically include aspects of child maltreatment (abuse, neglect, witness to crime, exploitation, trafficking), by conducting a descriptive quantitative study via an online Qualtrics survey. This study seeks to recruit a total of 100 participants.

RISKS

Participation in this on-line survey research presents no more than minimal risk of harm and involves no procedures for which written consent is normally required outside of the research context. Your responses to this survey will remain anonymous.

BENEFITS/ COMPENSATION

- All 100 participants will be awarded a \$10 e-gift card for their participation.
- Gathering important insight for CACREP programs regarding strengths and needs in preparing future counselors.
- Potential future implications in coursework, training, and experiential learning.
