CARFAX Glossary [View Full Glossary](#)

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Ford or Lincoln Mercury Recall

The Ford Motor Company provides Carfax with recall information regarding safety, compliance and emissions programs announced since 2000 for a specific vehicle. For complete information regarding programs or concerns about this vehicle, please contact a local

[Ford or Lincoln Mercury Dealer.](#)

Lease

When someone leases a car from a dealer, the dealer actually sells the vehicle to a leasing company. The leasing company then collects payments for the vehicle from the new owner for 24, 36, 48 or more months. A leasing company can be an independent car dealer or a car manufacturer.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1994 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Repossession

When a repossession occurs a vehicle owner fails to make loan payments, and the financial institution holding the title takes possession of the vehicle.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

LEGEND

The National Highway Traffic Safety Administration (NHTSA) provides 3 different ratings - [full-width frontal crash test](#) , [side impact crash test](#) , and [rollover resistance](#) . The frontal crash test indicates how well the safety features and restraints will protect an occupant in a head-on collision. The side-impact test conveys the chance of a severe chest injury, while the rollover resistance rating estimates the risk of rolling over in a single vehicle crash. Go to [NHTSA](#) to learn more about these results.

[Theft Index](#)

Score:

86

84

65

Rating:

Average

Average

Average

These scores are stated in relative terms, with 100 being the average for all cars in each category. Scores greater than 100 represent higher risk in each category. For example, an injury indicator score of 122 means that a passenger in this model is 22% more likely to be injured in an accident. The injury, collision, and theft indicators for this 1999 FORD TAURUS SE are provided by the Insurance Institute for Highway Safety, Highway Loss Data Institute. [Learn more](#) about these results.

Safety Recalls

NHTSA Safety Recalls:

Important: The following recalls were issued for the 1999 FORD TAURUS SE by the National Highway Traffic and Safety Administration (NHTSA). To find out if a specific 1999 FORD TAURUS SE still has open recalls that require repair, CARFAX recommends contacting an [authorized dealership](#) for more information.

Recall date:	Not reported
Units potentially affected:	899,060
NHTSA campaign number:	04V332000
Defective part or component:	SUSPENSION:FRONT:SPRINGS:COIL SPRINGS
Description:	On certain passenger vehicles currently registered in the states of Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, West Virginia, Wisconsin, and the District of Columbia, the front coil springs could potentially fracture when operated in high corrosion areas (where salt is used on the roadways for winter). A fractured spring could move past the spring seat and contact a front tire. If a spring should fracture and come into contact with a tire, the tire may rupture resulting in a rapid air loss, which could result in a crash. Dealers will install protective spring shields. Owner notification is expected to begin during August 2004. Owners should contact ford at 1-800-392-3673. In addition, Ford is extending the coverage of the front coil springs, for fracture only, up to 10 years of service or 150,000 miles from the warranty start date of the vehicle, whichever occurs first. If the vehicle has already accumulated more than 150,000 miles, this coverage will last until July 31, 2005. If either front coil spring fractures, dealers will replace both front springs at no charge to the owner under the terms of this extended coverage.

Recall date:	09-03-1998
Units potentially affected:	6,000
NHTSA campaign number:	98V204000
Defective part or component:	FUEL: THROTTLE LINKAGES AND CONTROL
Description:	Vehicle Description: Passenger vehicles. A dash insulator retainer clip was not fully assembled to the accelerator cable dash fitting. The clip can disengage from the accelerator cable and fall into the accelerator pedal arm pivot area. If this condition occurs, the engine may not fully return to idle. Also, the insulator may not stay in the intended location and could interfere with the accelerator cable. Dealers will inspect these vehicles to ensure proper installation of the accelerator cable clip, and re-install if needed.
Recall date:	Not reported
Units potentially affected:	1,800
NHTSA campaign number:	98V288000
Defective part or component:	POWER TRAIN: TRANSMISSION: AUTOMATIC: COOLING UNIT AND LINES
Description:	Vehicle Description: Passenger vehicles equipped with the ""California"" emissions package. An incorrect transmission oil cooler line was installed. The line contacts the anti-lock braking system module support bracket and over time, can wear and develop a leak. Transmission fluid leakage onto the exhaust manifold or catalytic converter can result in a fire. Dealers will install the appropriate transmission oil cooler line.

This 1999 FORD TAURUS SE safety recall information was provided by the Insurance Institute for Highway Safety, Highway Data Loss Institute and is derived from the [National Highway Traffic and Safety Administration](#) list of safety recalls. Please call the National Highway Traffic and Safety Administration Auto Safety Hotline at 1-888-DASH-2-DOT (1-888-327-4236) to report safety defects or to obtain information on cars, trucks, child seats, and highway or traffic safety. CARFAX does not review, validate or edit the information and statements provided by the National Highway Traffic and Safety Administration, which do not represent the opinion of CARFAX.
