JOB DESCRIPTION

COMPANY: CCPI Inc.

POSITION: **Electrical or Mechanical Engineer** – North West Indiana

SUMMARY: Responsible for providing engineering/service support for new and existing Comat equipment in steel mill applications. Maintain and increase production efficiencies as well as troubleshoot problems, identify and implement solutions. Develop and conduct equipment specific training for Comat and customer personnel. Successfully communicate account activities with the assigned COMAT Regional Sales Manager, CCPI Management and the customer.

EQUIPMENT

Responsible for providing engineering/service support for new and existing Comat equipment including PLC controlled mixing/pumping systems, multi-burner direct fired combustion systems and robotic spray application systems. Plan, schedule, coordinate and perform preventive and corrective maintenance based on established procedures.

SAFETY

Responsible for compliance with all COMAT and customer safety requirements. Ensure that all safety related documents are generated and maintained as required by COMAT Management, and the customer.

CUSTOMER SERVICE

Responsible for developing and maintaining a “Customer Service” oriented relationship between COMAT and the customer. Work with customer to provide solutions. Ensure Comat Equipment is maintained to guarantee uninterrupted support of customer’s operation.

JOB REQUIREMENTS

- Bachelor’s Degree in Electrical or Mechanical Engineering
- Self-starter with a high degree of demonstrated initiative and flexibility.
- Familiar with the following:
 - Controls/Automation
 - PLC and HMI programming.
 - Robotics Handling Tool programming.
- Proficient in Microsoft Office software.
- Prior steel mill experience a benefit.

CCPI Inc. provides an excellent compensation and benefit program including a competitive salary, 401(k), and comprehensive insurance coverage.
