Web Development & Data Science - Fall 2022 and Summer 2023 Internship

Are you a motivated Web Developer, Data Scientist or Software Engineer who wants to assist in the design and build applications from the ground up? Do you like to design and build algorithms as much as you like to write code? If so, come join the summer internship.

If needed, we may sponsor a work <u>Visa for International Students</u>.

Level of Education: Undergraduate and Graduate
Contact Person: Matt Hosseini, matt@startinvest.com

How to Apply: Please send your resume/CV by 08/15/2022 to <u>matt@startinvest.com</u>

<u>Company:</u> StartInvest
https://www.startinvest.com
Internship with maximum pay up to $50 per hour, maximum of 40 hours a week
Location: Los Angeles and/or Remote

Company:

StartInvest helps companies raise capital by private equity on our web platform. With over $200 billion in marketcap in US, our Fintech strategy is aimed to be the number one online private equity market provider. StartInvest is transforming its business and shaping the financial services sector by driving quality, convenience, and customer service to new levels of excellence. It's an exciting time for our organization, to aim for our highest goals and achievements. If you're ready to unleash your potential to help drive change through bottom-up innovation, apply now.

StartInvest's unique Fintech approach to private equity gives us a great advantage in helping early-stage all the way to Pre-IPO companies. We help investors by giving them access to private deals which has been very limited before. We believe the future of venture capital is here and we may disrupt it through technology. The combination of the unprecedented access to private equity and Fintech results in great ideas and companies being funded, paving the way to a brighter future.

Internship at StartInvest:

At StartInvest, you will join our team of developers and engineers to gain hands-on experience in web development. Your hands-on experience will help you toward your short-term and long-term career goals by giving you the opportunity to learn and practice in an applied setting. The learning and practice challenges will strengthen your problem-solving capabilities along with teamwork skills.

- Perform hands-on software development, including writing code from scratch, unit tests, doing proof of concepts, conducting code reviews, and testing in ongoing sprints
- Work closely with other developers to implement innovative solutions to challenging web development problems
- Participates in system design and specifications, program logic and flow-charting, development, testing, debugging, documentation, and support

- Drive automation and ensure automated test scripts are completed for new features
- Provides analysis of problems and recommends solutions

Qualifications

- BS or MS degree in computer science, or equivalent 2+ years of work experience
- Strong experience building progressive web applications
- Experience working with React
- Strong background with JavaScript
- Experience working with NodeJS
- Experience working with PostgreSQL and MongoDB
- Experience with AWS
- Proficiency working with Docker
- Proficiency working with GraphQL and Kubernetes
- Strong experience in systems architecture design and development
- Experience using test-driven development practices
- Ability to efficiently manage and build large, complex web applications
- Strong analytical and problem-solving skills, with good attention to detail
- Excellent oral and written communication skills
- Self-motivated, ability to work independently
- Ability to use creative thinking to develop innovative solutions to business problems
- Strong project management skills, including the ability to manage multiple projects simultaneously
- Ability to mentor other developers and interns

Additional Information

- Professional maturity, integrity, discipline, and a positive attitude.
- Ability to work in a fast-paced, team environment.
- thoughtful, organized, and disciplined: You take initiative and ownership to see things through to completion and empower others to do the same.
- Entrepreneurial spirit: you're agile, creative, resourceful, and tenacious as you solve problems and achieve team and company goals.
