

From OU to NASA

**How Engineering at Ohio University
helped launch a career at NASA**

Dr. Evan Dill is currently a senior researcher at NASA's Langley Research Center, leading efforts in assured autonomy and Positioning, Navigation, and Timing (PNT) systems for aeronautics applications. This talk will highlight some of his ongoing research and reflect on how his education at Ohio University prepared him for success at NASA.

Dr. Evan Dill, an Ohio University alumnus, earned both his undergraduate and graduate degrees in Electrical Engineering at OHIO and previously worked at the Avionics Engineering Center.
