

Call for Participants
Emerging Technologies showcase
AECT Conference – 6th & 7th November 2014

The Emerging Technologies Showcase invites AECT members to share their work and experiences during the 2014 conference. We seek members researching and experimenting with the latest technologies (google glass, mobile devices, augmented reality, learning analytics, etc.) or with novel uses of old tools for teaching and learning.

The session will include a brief opening address by George Veletsianos, Canada Research Chair in Innovative Learning and Technology, and Associate Professor at Royal Roads University.

We plan on hosting two sessions: Thu, 6th November, 4:45 - 5:45pm
and Fri, 7th November, 10:30 to 11:30am.

Please submit a request to participate no later than 5th September 2014
