

The Ohio University Council of
Teachers of Mathematics Presents:

Mathematics for Social Justice:

π

Creating a Classroom to
Combat Inequality and
Celebrate Diversity

By: Eric (Rico) Gutstein, PhD,
University of Illinois-Chicago

March 14 , 2013 (3.14!!)

7:00 pm

Walter Hall 235

Free and Open to the Public

Light refreshments provided

Gutstein, a social justice advocate, critical educator, and author of many books on teaching and critical pedagogy, works to help teachers create a critical mathematics curriculum that **challenges oppression, structural inequality (classism, poverty, racism, linguicism, sexism), raises students' political consciousness, and empowers students by honoring and celebrating cultural diversity in the classroom.** His work can and should be applied to all content areas.

This is a SAC-funded event. We would like to thank SAC for their generosity. For more information on SAC or how to obtain SAC funds, visit www.ohio.edu/sac
