

On Monday, October 27, 2014 @ 10:00am in Irvine 199 (near the bricks)

The Biological Sciences Graduate Society Presents:

Wetlands in the sky: a tale of diversity under adversity and the impending crisis in the canopy

Shawn McCracken, Ph.D.

Dr. McCracken is a community ecologist at Texas State University in San Marcos, Texas. He will talk about his discoveries of herpetofauna inhabiting tank bromeliads in the high canopy of the Amazon rainforest, how bromeliads create wetlands in the sky that serve as a keystone resource, and impacts of forest disturbance on the bromeliad mesocosm.

Light refreshments will be served.

Join us for dinner* too!

Monday, Oct. 27, 2014

5:30pm at Sol Restaurant

*Dinner costs not included in event
