

On **Wednesday, December 10th** at **4 PM** in **Irvine 199**
The Biological Sciences Graduate Society presents:

Thermoregulation is for the Birds

a lecture by Glenn Tattersall, PhD

Dr. Tattersall is a comparative and evolutionary physiologist from Brock University in Ontario, Canada. He will be discussing his studies on avian thermoregulation, with a particular emphasis on his recent discoveries highlighting the importance of the bill as a heat exchanger, in addition to its obvious role in feeding. His talk will cover areas from thermoregulatory physiology to biogeography, and touch on his recent research project examining these questions in Darwin's finches of the Galapagos Islands.

Light refreshments will be served.

OHIO
UNIVERSITY

*join Dr. Tattersall and members of BSGS for pizza and discussion on
Wednesday, December 10th at **12 PM** in **103 Life Sciences Building***
